Use the power supply with the clear plastic end. The message counter comes on and alternates When there is no clear line of sight between the base and handset, e.g. base indoors and handset either indoors or outdoors, the range could be reduced to 50 metres. Thick stone walls can severely affect the range. When you are out of range, it flashes and BASE 1 is displayed. Then slide When the handset is If the symbol flashes and you hear a warning beep, you are out of range and will need to move closer to The main menu announcements are automatically made via the handset when Enter the correct setting within 15 seconds or the handset will return to standby. If the day and time are entered incorrectly 3 times the handset will return to standby. Use the power supply with the red plastic end. Open Calls list, page 32. Flashes when the handset is in use. Each menu has a list of options, which you can see on the menu map on the following page. You can correct any mistakes before you actually make the call. See page 32 for more information. It also enables other people in the room to listen to your conversation over the loudspeaker. The most recent number will be shown first. Your caller cannot hear you now. Names can be up to 8 characters long and numbers up to 20 digits. Press three times for 1. Press again. Certified for Teams, compatible with GoToMeeting, Zoom and more We value our customers and value your feedback so if you have any comments please get in touch with us. You can also find out more about us and some of our services and clients. Thank You. Simply hover the cursor over the page number, website or reference and click when the icon changes to the icon. Think before you print! Before you make your first call you will need to set up your phone. Follow the simple instructions in Getting Started, on the next few pages or refer to the quick setup guide enclosed in the box if you haven t already done so. Our dedicated advisors are more likely to be able to help you than the retailer where you made your purchase. Alternatively, you may find the answer in the Help section at the back of this guide or online at IMPORTANT Only use the power adaptor and telephone line cord supplied, or this product may not work. Hearing aid Please note that the BT Inspire 1500 works by sending radio signals between the base and handset. These signals may interfere with some hearing aids, causing a humming noise. Mobile and International call costs may vary. Make sure it is at least 1 metre away from other electrical appliances to avoid interference. Your BT Inspire 1500 works by sending radio signals between the handset and base. The strength of the signal depends on where you site the base. Putting it as high as possible ensures the best signal. Setting up 1. Plug the power cable with the blue end into the socket marked on the underside of the base and plug the other end into the power wall socket and switch the power on. You can place the cable behind the retaining clip to prevent the plug being accidentally pulled from the socket. Cable retaining clip Mains power cable Telephone line cord preinstalled The base indicator lights up. The answering machine is switched on. 2. Batteries will come inserted in the battery compartment.

Remove the protective film from the handset screen and activate the batteries by pulling the plastic tab away from the back of the handset. WARNING Do not place your BT Inspire 1500 in the bathroom or other humid areas. Handset range The BT Inspire 1500 has a range of up to 300 metres outdoors when there is a clear line of sight between the base and handset. Any obstruction between the base and handset will reduce the range significantly. With the base indoors and handset either indoors or outdoors, the range will normally be up to 50 metres. Thick stone walls can severely affect the range. Signal strength The icon on your handset indicates when you are in range. If moving out of range of the base, the range indicator will flash. If you go out of range, any call you are on will be lost. IMPORTANT The base station must be plugged into the power socket at all times.

Do not connect the telephone line to the telephone wall socket until the handset is fully charged. Only use the power and telephone cables supplied with the product. Battery low warning If the icon flashes in the handset display you will need to recharge the handset before you can use it again. You also hear a low battery warning beep once every 60 seconds. During charging, the icon will scroll in the display as shown on page 10. Rechargeable batteries already fitted Remove this tab and charge batteries for 24 hours before use. BT Inspire 1500 multiple pack owners only Location You need to place your BT Inspire 1500 charger close enough to a mains power socket so that the cable will reach. Setting up the charger 1. Plug the power adaptor cable item code into the underside of the charger and secure the cable behind the retaining clip. Plug the other end into the mains wall socket and switch the power on. Mains power cable 2. Remove the protective film from the handset screen and activate the batteries by pulling the plastic tab away from the back of the handset.

Battery performance In ideal conditions, a fully charged battery should give up to 12 hours talk time or 120 hours standby time on a single charge. Note that new batteries do not reach full capacity until they have been in normal use for several days. Eventually they will need to be replaced. After charging your handset for the first time, subsequent charging time is about 6 8 hours a day depending on usage. Batteries and handset may become warm during charging. This is normal. Using your BT Inspire 1500 on a Broadband line. If this product is to be used on a broadband line then you must ensure that it is connected via an ADSL microfilter. Using this product on a Broadband line without an ADSL microfilter may cause problems with this product and your Broadband service. Additional BT ADSL microfilters can be purchased from 3.
